

NEU- We Make A Material Difference

MEDICAL COMPOUNDS

Improving your products performance and productivity is NEU's specialty. NEU serves most of the world's leading medical device and components manufacturers with state-of-the-art polymer raw materials and custom formulating technology gained from more than 25 years of experience in engineering resins and elastomers.

Nylon 6	Nylon 66	Rilsan Nylon 11	Nylon 12	Impact Nylon
Pebax PEBA	LDPE LLDPE	HDPE	MDPE	Santoprene TPV
Engage Affinity	Polypropylene	Acetal POM	TPO TPR TPE	Elvax EVA
SAN and ABS	Surlyn Ionomer	Hytel TPE	Pellethane TPU	Tecoflex TPU
PET and PETG	PC PC/PET	ABS	Isoplast TPU	Tecothane TPU

Radiopaque Fillers	PMS, DIN color matching	Precision Melt Filtration	Blends and Alloys
--------------------	-------------------------	---------------------------	-------------------

Customers experience fast, efficient customization services, performed by experienced industry professionals with the highest quality and purity at the ***lowest possible prices plus quick turnaround.***

- ❑ Full-lot analysis, blending and homogenization for precision extrusion results and increased product yields
- ❑ Custom color matching, radiopaque fillers, color stabilization, intermediate hardnesses and blends
- ❑ Full lot traceability with records retention
- ❑ One source for R&D quantities and full scale production runs
- ❑ ***25 lbs to 500,000 lbs***
- ❑ Your source for technical services and processing assistance
- ❑ Polymer analytical services, consultation and custom polymer development
- ❑ Fast, personal, confidential and professional service
- ❑ Virgin resins for your convenience - all grades of Pellethane, Pebax, Vestamid, polyethylene, etc.
- ❑ ***Compounds are NEU's only business***

Please call for a prompt quote or to discuss your polymer performance and processing needs.

We make a material difference!
